

## Voluntary Remediation Program (VRP) Site List

Information last updated: April 2003

The following is the most current list of VRP sites that are no longer confidential. This list is updated frequently but no more than once a month.

[Site List](#)

April 2003

[\[xls\]](#)

[\[txt\]](#)

The status categories for the site are:

**Active** - This project has a signed contract with VRP known as the Voluntary Remediation Agreement (VRA) and is no longer considered confidential.

**COC** - A Certificate of Completion has been issued by IDEM. If it is designated as COC - p, the certificate is in processing.

**CNTS** - A Covenant Not To Sue has been issued by governor via IDEM (issued after the Certificate of Completion). If it is designated as a CNTS - p, the covenant is in processing.

**TOP** - A Technical Opinion Letter has been provided to the site because a COC/CNTS were not appropriate. (A technical opinion letter is written by the project manager and it carries no release of liability.)

Note: All VRP sites are considered confidential until the applicant and IDEM sign the Voluntary Remediation Agreement (VRA) which is a contractual agreement. No work is performed by IDEM on a project until the VRA is executed. Confidential sites do not appear on this list. It should also be noted that terminated and withdrawn sites are not on this list.
